Re: Review of Final Interim Measures/Interim Remedial Action Plan, Decision Document and Responsiveness Study for OU 1.

Dear Mr. Simonson,

The Colorado Department of Health, Division of Hazardous Materials and Waste Management (the "Division") and the U.S. Environmental Protection Agency (EPA) have reviewed the final Interim Measures/Interim Remedial Action Plan (IRAP), Decision Document and Responsiveness Study for the 881 Hillside (Operable Unit 1). The Division's comments are presented below. EPA's comments will be submitted in a separate letter. The Division recognizes the January, 1990 plan, EPA's and the Division's comments as the final plan to be carried forward at the 881 Hillside.

The schedules outlined on pages 3-1 and 3-2 of the IRAP are not consistent with those outlined in the Environmental Restoration IAG Baseline Schedules dated January 8, 1990. Schedules in the IRAP and the IAG must be consistent. DOE must submit to the Division and EPA a written request of concurrence on any changes to the schedules.

The Division emphasizes that the water quality standards that were preliminarily adopted January 3, 1990 by the Water Quality Control Commission must be applied to Pond C-2 discharges. If Pond C-2 water analyses indicate that the water quality standards are exceeded, then treatment of Pond C-2 water is necessary prior to discharge.

The Community Relations Work Plan attached to the Responsiveness Summary will be reviewed by the Division in accordance with the schedules outlined in the IAG.
